

# Eagle Fleet

# COMPANY PROFILE

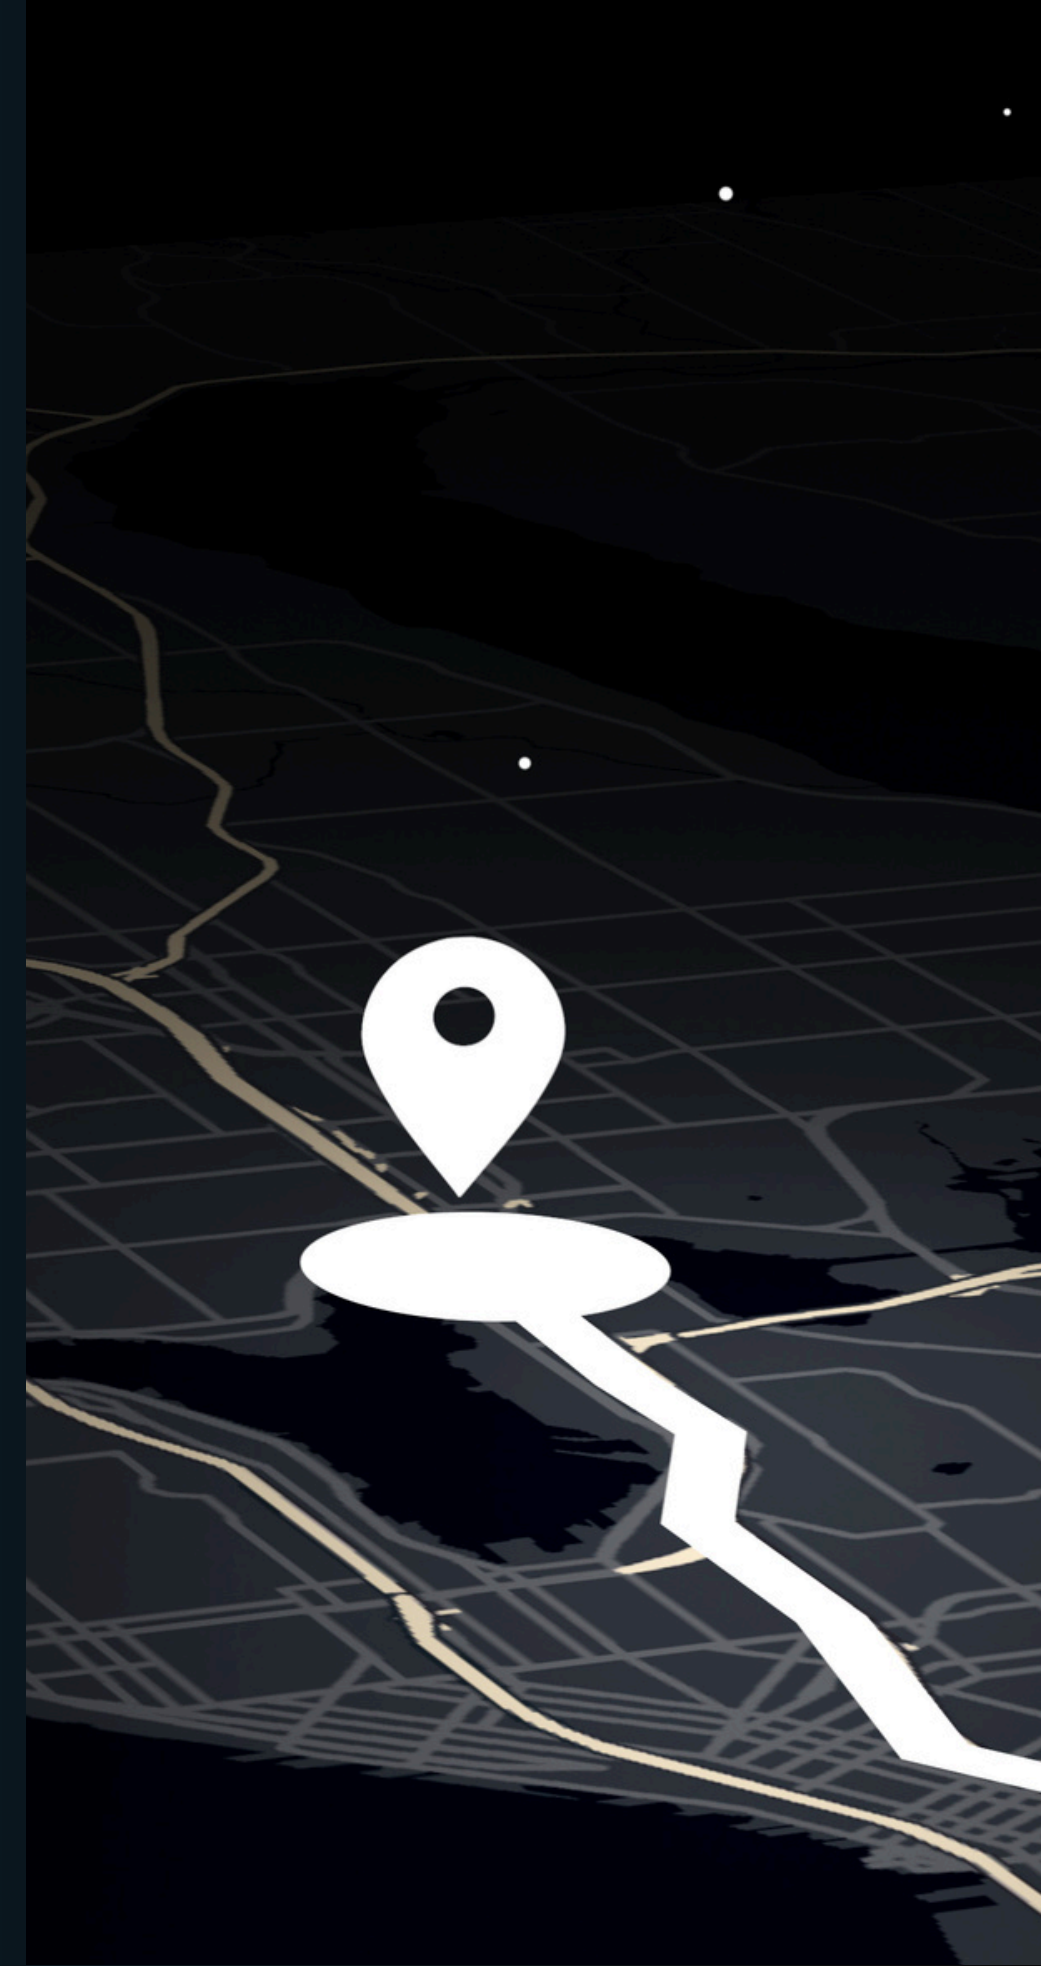

# ABOUT US

Eagle Fleet Solutions is a new innovative fleet management solutions & vehicle tracking company.

Eagle Fleet Solutions intuitive, full-featured to better manage their drivers and vehicles by extracting accurate and intelligence for real time and historical trips.

Eagle Fleet Solutions helps organizations to access critical business intelligence and bench-marking data to increasing service delivery, productivity and improve safety while reducing fuel consumption and strengthening compliance. Our clients extend the value of their fleet management

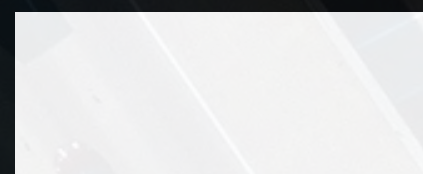

## OUR MISSION

Our mission is to ensure operational efficiency and effectiveness of our clients fleet management.

## VISION

Our vision is to become a leader in an innovative approach to fleet management and vehicle tracking.

# OUR VALUES

## Eagle Fleet Solutions is driven and inspired by our 5 culture charts. These directly translate into providing for our clients.

We believe that every person is worthy and to be treated with dignity regardless of her/his status. We all deserve respect and we should also practice it.

### Respect

We believe that every person is worthy and needs to be treated with dignity regardless of his/her status. We all deserve respect and we should also practice it.

### Honesty

We believe that honesty at the workplace instils trust amongst employees, employer and clients. Creating an atmosphere of honesty also foster an environment of self accountability and responsibility.

### Integrity

When we have the ability to act with honesty and be consistent in whatever it is we are doing based on the particular moral, values or believe , that build trust and reputation.

### Love

We believe that employees who feel loved perform miracles.

### Transparency

Transparency fosters a culture of trust between the organisation and the clients .

# iButton

## Driver Authentication (iButton)

The iBUTTON allows you to identify each and every driver, and able you to study their driving behavior when driving.

Address only

Memory

Real-time clock

Secure

Data loggers

### Bio GSM

The Bio GSM unit is fitted with a relay for control of a vehicles ignition, the power button of a machine or an electronic locking device.

The Bio GSM unit will require the driver or operator to scan their allocated finger for verification on the fingerprint sensor.

This fingerprint template will have been pre- viously sent to the intended unit. If the scan is authorized the driver/operator will be al- lowed to start the vehicle or machinery.

This electronic transaction is stored with a time and date stamp and is sent via GSM to the control room for reporting

### Product Highlights

User Verification

Duress Print – Emergencies

DAN (Driver Alert Notification)

The DAN is an important feature that is designed to confirm that the driver driving the vehicle, or opera- tor operating the machinery, is still the same person that was verified on the BIO GSM at start-up.

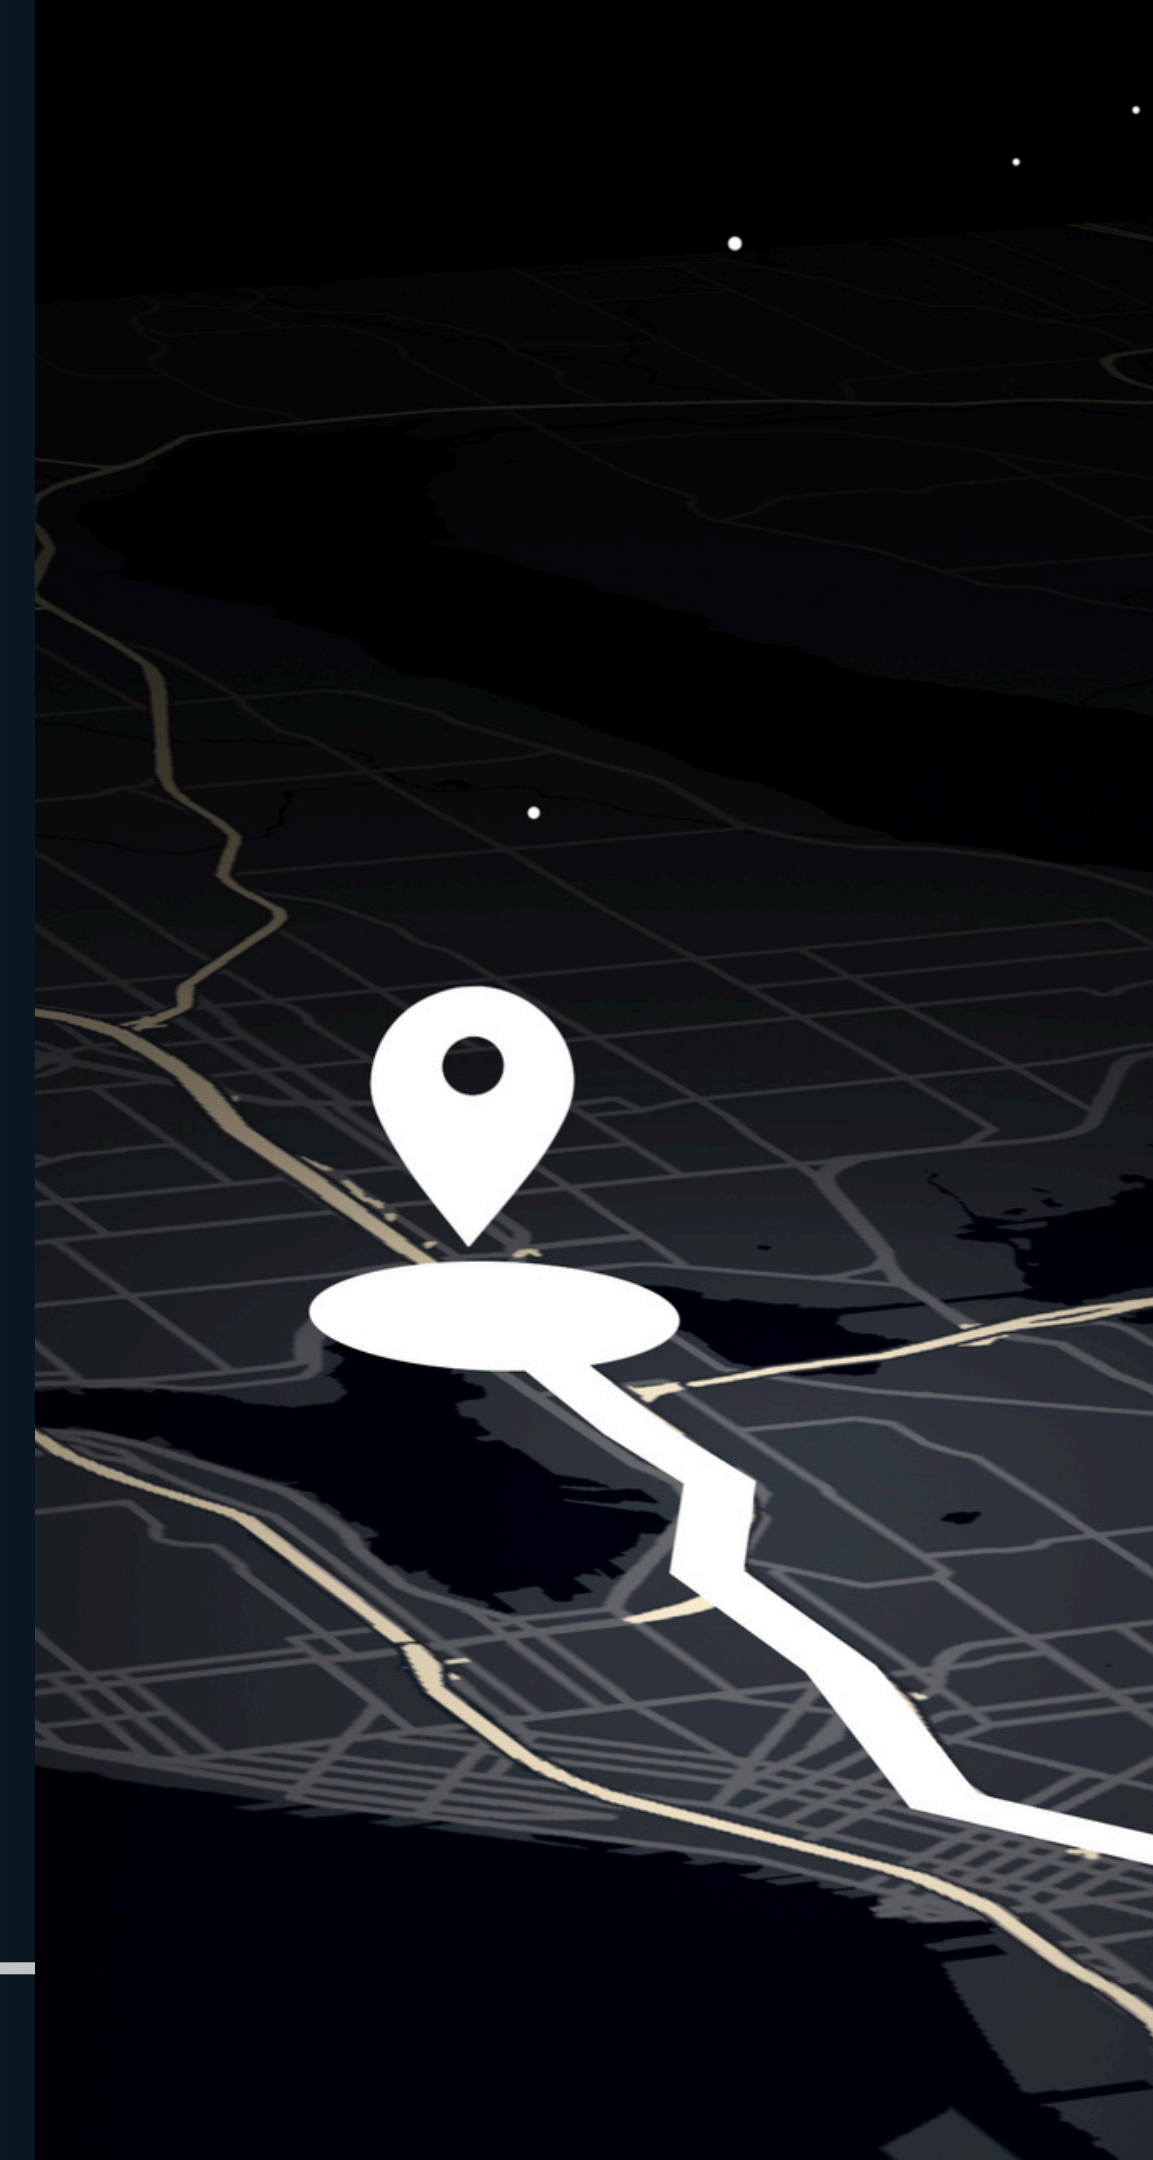

Failure to scan when prompted will result in a “failed to clock” signal being sent to the control room.

### Multipurpose Speed limit

The speed limiter uses its own in- built GPS receiver to monitor speed.

The maximum speed limit is pre-programmed into the ECU (Electronic control unit)

GPS speed is true speed. At 5% below speed limit the speed limiter will sound an intermittent alarm to alert the driver. When the vehicle reaches speed, the alarm will sound continuously and engine power will be reduced to prevent further acceleration.

# Disk Renewal

Our system lets you know when your vehicle disc is about to expire.

## Features of the software

- ✓ Cost-efficiency Fast time to
- ✓ benefit Fixed or dynamic routine
- ✓ Capability
- ✓ Real time visibility Fast and simple
- ✓ communication Compatibility
- ✓ Advanced reporting

## Customized fleet management software

Our customized fleet management software helps our clients to monitor their fleet and create more efficient vehicle routes.

# Vehicle Inspection

Our vehicle inspection is almost necessary to ensure that your business remains operational and your rigs are always running smoothly. Unforeseen maintenance can arise at any time and if it goes unnoticed, this can result in larger issues.

However, conducting daily maintenance while using a paper-based system may not only increase costs but will also take longer to complete. The benefits of streamlining your inspection using Eagle Fleet vehicle inspection are almost countless.

## Conduct vehicle inspections anywhere

Eagle Fleet allows you to carry and conduct vehicle inspections any- where. The platform is even easily accessible. Instead of spending time looking for misplaced inspection forms, you can easily access your digital inspections through the mobile platform.

## FITMENT CENTRE SERVICES

Fleet Installation, Technical Integration & Mobile Fitment Capability

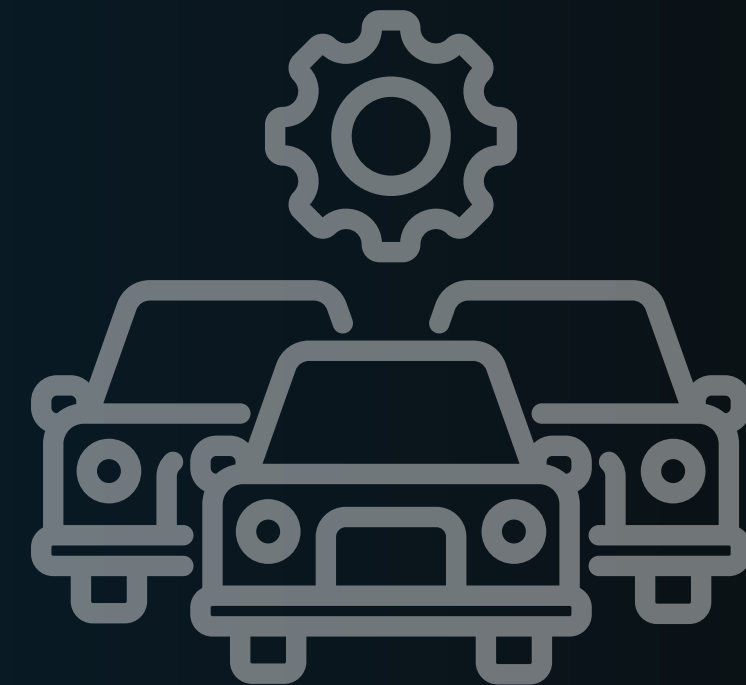

Eagle Fleet Solutions operates a fully equipped, black-owned fitment centre, supported by trained and experienced technicians capable of delivering both workshop-based and mobile fleet installations.

The Fitment Centre forms a critical part of Eagle Fleet Solutions' service delivery model, ensuring quality workmanship, rapid deployment, and ongoing technical support across multiple provinces.

### Core Fitment & Technical Services

Eagle Fleet Solutions provides professional installation and integration services for:

- Vehicle tracking and fleet management systems
- Telematics devices and GPS units
- Driver identification and authentication systems
- Dash cameras and video telematics solutions
- Ignition control, immobilisers, and relays
- Vehicle wiring, diagnostics, and electrical integration
- Central locking systems and vehicle alarm installations

Bloemfontein

To whom it may concern

1. This is to confirm that Eagle Fleet Solutions, represented by Mr. Thabo Moloi, rendered vehicle tracking and monitoring services to the South African Social Security Agency (SASSA) under a Service Level Agreement (SLA) that was effective from the 1<sup>st</sup> of April 2021 to 31<sup>st</sup> of March 2024.
2. During this period Eagle Fleet Solutions was responsible for the real – time tracking, monitoring and reporting of SASSA's fleet. Their services included system implementation device installation, technical support and ongoing fleet performance reporting.
3. SASSA hereby acknowledges that Eagle Fleet Solutions provided the contracted services in line with the SLA requirements and conducted their duties professionally and reliably through the agreement period.
4. Their contribution assisted in improving the operational oversight of SASSA's fleet activities and the Agency found their team to be responsive, skilled and cooperative.

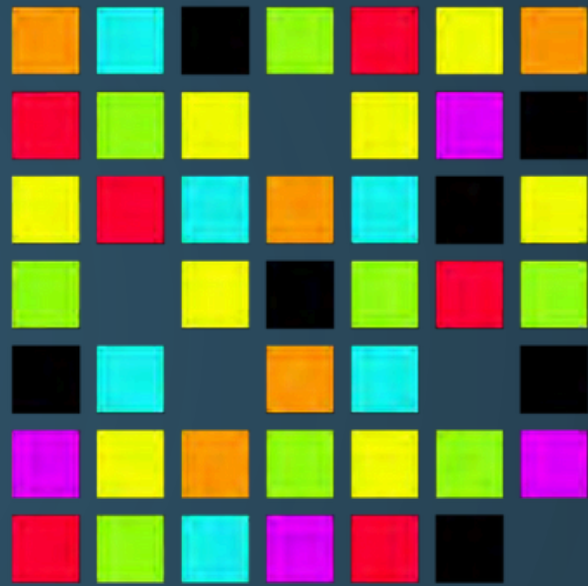

Should further clarification be required, please feel free to contact the Agency.

Kind regards
